1. Annual Rolling Stock Report

Pacific National Pty Ltd (PN), is the holder of Environmental Protection Licence 21364 (EPL 21364).

In accordance with **Condition R4.2**, PN is required to submit an Annual Rolling Stock Report (the Report), by 28 February each year for the previous calendar year reporting period.

This Annual report is for the reporting period **1 January 2021 to 31 December 2021**.

Requirements for this Report are listed in **Table 1**.

Table 1: Condition R 4.2: Annual Rolling Stock Report

No.	Requirement	Location in Report
R4.2	The licensee must submit to the EPA no later than 28 February of each year an Annual Rolling Stock Performance report for the previous calendar year (1 January to 31 December). The report must include:	
a	a) the number of the licensee's locomotives that underwent a Major Engine Overhaul in the calendar year and, for each locomotive:	Section 2.1
i	<i>the unique identification number of the locomotive;</i>	Table 2 Appendix A
ii	<i>details of the class, type/model, the engine manufacturer and engine model; and</i>	Table 2 Appendix A Sheet 1
iii	<i>the date of the Major Engine Overhaul.</i>	Table 2 Appendix A Sheet 1
b	<i>details of all locomotives identified under Condition M5.3(e) and a summary of the noise mitigation measures in the plan of management required by Condition M5.3(e) that were undertaken and completed during the calendar year, if any.</i>	Section 2.2 Table 2 Appendix A Sheet 1, Sheet 2*
c	<i>details of any unacceptable Angle of Attack event identified for a freight wagon of a priority wagon class within the meaning of this licence during the calendar year for the purposes of Condition M5.2. These details must include:</i>	Section 2.2
i	<i>the unique identification number of each freight wagon involved and the time and date of any unacceptable Angle of Attack event at a Wayside Monitoring System location;</i>	Appendix A Sheet 3 Column B
ii	<i>whether the freight wagon identified under Condition R4.2(c)(i) has been rectified in accordance with Condition U5 of this licence, or when rectification is scheduled to occur for the identified freight wagon; and,</i>	Appendix A Sheet 4 Column E

No.	Requirement	Location in Report
iii	<i>where a freight wagon of a priority wagon class that has been subject to rectification under Condition U5 has recorded an unacceptable Angle of Attack, the additional measures to ensure the wagon has an acceptable Angle of Attack and timeframes for implementation of those measures.</i>	Not Yet Applicable
d	<i>the number of freight wagons of a priority wagon class that underwent rectification under Condition U5 during the reporting period and for each freight wagon:</i>	
i	<i>the unique identification number of the freight wagon;</i>	Appendix A
ii	<i>details of the class of the freight wagon; and</i>	Appendix A
iii	<i>a summary of the corrective measures undertaken to rectify the freight wagon, including the date of freight wagon rectification.</i>	Appendix A

2. Major Engine Overhaul

A locomotive Major Engine Overhaul is defined as per the Stock Licence Dictionary of EPL 21364 as either:

A scheduled maintenance procedure that either replaces or inspects and qualifies each and every power assembly of the locomotive engine.

A major engine overhaul will not include unscheduled maintenance to replace these components due to unforeseen failure of engine component(s) prior to scheduled maintenance;

or

Installation of a remanufactured or freshly manufactured engine into an existing locomotive.

Table 2 provides an overview of locomotives which underwent major engine overhauls during this reporting period (**Appendix A**, Sheet 1).

Table 2: Locomotive Major Engine Overhauls for Reporting Period

Pacific National is currently implementing a Locomotive Noise Testing Program which was submitted to the NSW EPA on 20 October 2021 to ensure that the backlog of locomotives that have not been tested during the previous reporting periods are scheduled for testing, and to ensure that all future noise testing is now assimilated into the business as usual maintenance planning and scheduling frameworks. Pacific National is providing monthly reporting updates to the NSW EPA to demonstrate continued progress as we identify suitable testing sites within the network to satisfy monitoring and testing standards as per EPL obligations.

3. Locomotive Noise Testing

Appendix A Sheet 1 lists those locomotives overhauled during the 2021 reporting period along with the status of noise testing. Sheet 2 represents the status of those locomotives undergoing overhaul since the inception of the licence until December 31, 2020.

Pacific National has undertaken 3 locomotive noise tests during 2021. All locomotives met the limits for noise documented in Condition 3.5 of EPL 21364 (Appendix A Sheet 1, Sheet 2 Column H).

Minor tonality was observed during all tests for low idle and lower notches. Pacific Nationals Acoustic Consultants have noted that:

It is noted that the EPL license definition of tonality does not consider the noise level recorded in each frequency band relative to the overall noise levels.

It is therefore possible that noise emissions can be classified as tonal despite the tone occurring in a frequency range that does not form part of the dominant locomotive noise emission profile.

This, along with accompanying noise from wheel/rail interaction and rolling stock while in operation, would result in the measured tonality being unlikely to cause additional annoyance.

In October 2021, Pacific National met with NSW EPA representatives to discuss the difficulties with the Noise testing program.

Difficulties relate largely to proposed sites not meeting the acoustic standard required for testing, thus requiring the use of alternative locations.

The use of alternative locations for noise testing requires:

- Locomotives to be bought out of revenue service to have testing undertaken;
- Commercial arrangements with third parties for access to suitable locations;
- Access arrangements for use of networks not part of an existing access agreement;
- Driver training and route certification on new routes.

As mentioned previously, PN has actively provided monthly status reports to the NSW EPA.

Pacific National has been able to identify Four (4) testing sites which will generally satisfy the monitoring and testing standards as required under the EPL. These sites include:

- **Kooragang Island Progress Rail Facility (NSW)** - while this site may at times have interference from the Port Waratah Coal Services conveyors - it optimises opportunistic testing with minimal interference to scheduled mainline services of coal fleet locomotives that are overdue for testing.
- **Bloomfield Colliery (NSW)** – validated for testing and trial conducted. Currently negotiating commercial arrangements to allow for Coal fleet testing only.
- **South Maitland Railways (NSW)** – currently negotiating access agreement and will require driver certification for route to access network.
- **Perth Freight Terminal (WA)** – validated for testing and trial conducted. Several locomotives have been tested on site during 2022.
- **Parks Logistics Terminal (NSW)** – validated for testing and trial conducted. Several locomotives have been tested on site during 2022.

Since 1 **January 2022**, we have proceeded to undertake 17 locomotive noise testing activities.

4. Angle of Attack

Priority Wagon Classes are defined¹ to as:

a class of freight wagons, as identified to the licensee by Transport for NSW, requiring rectification in accordance with Transport for NSW's standard titled THR RS 00400 ST RSU 400 Series – Minimum Operating Standards for Rolling Stock – Freight Vehicle Specific Interface Requirements Version 2.0 Issued date: 24 August 2017,

and

being one of the following priority wagon classes: RKWY, RQCY, VQCY, RKFX, RRY, CQWY, RKMY, RKKY, RKB, RRY, RKCX, RKHF, VQTY, RQTY, PBGY, ABSY, CQJY, CQGY, CQYY, CQEY, CQPY.

For reporting year 2021 **Appendix A** summarises the Angle of Attack (AoA) events and wheel recitation status for identified priority wagons.

- Angle of Attack exceedance data as provided by TfNSW is provided in **Appendix A, Sheet 4 and Sheet 5**.
- The priority wagon AoA exceedance data set is provided as **Appendix A** (Sheet 6).
- Identification of wagons exceeding the AoA threshold at Beecroft are identified in **Column B** of **Appendix A** (Sheet 3).
- The rectification status of the priority wagons is detailed in **Column E** of **Appendix A** (Sheet 4).

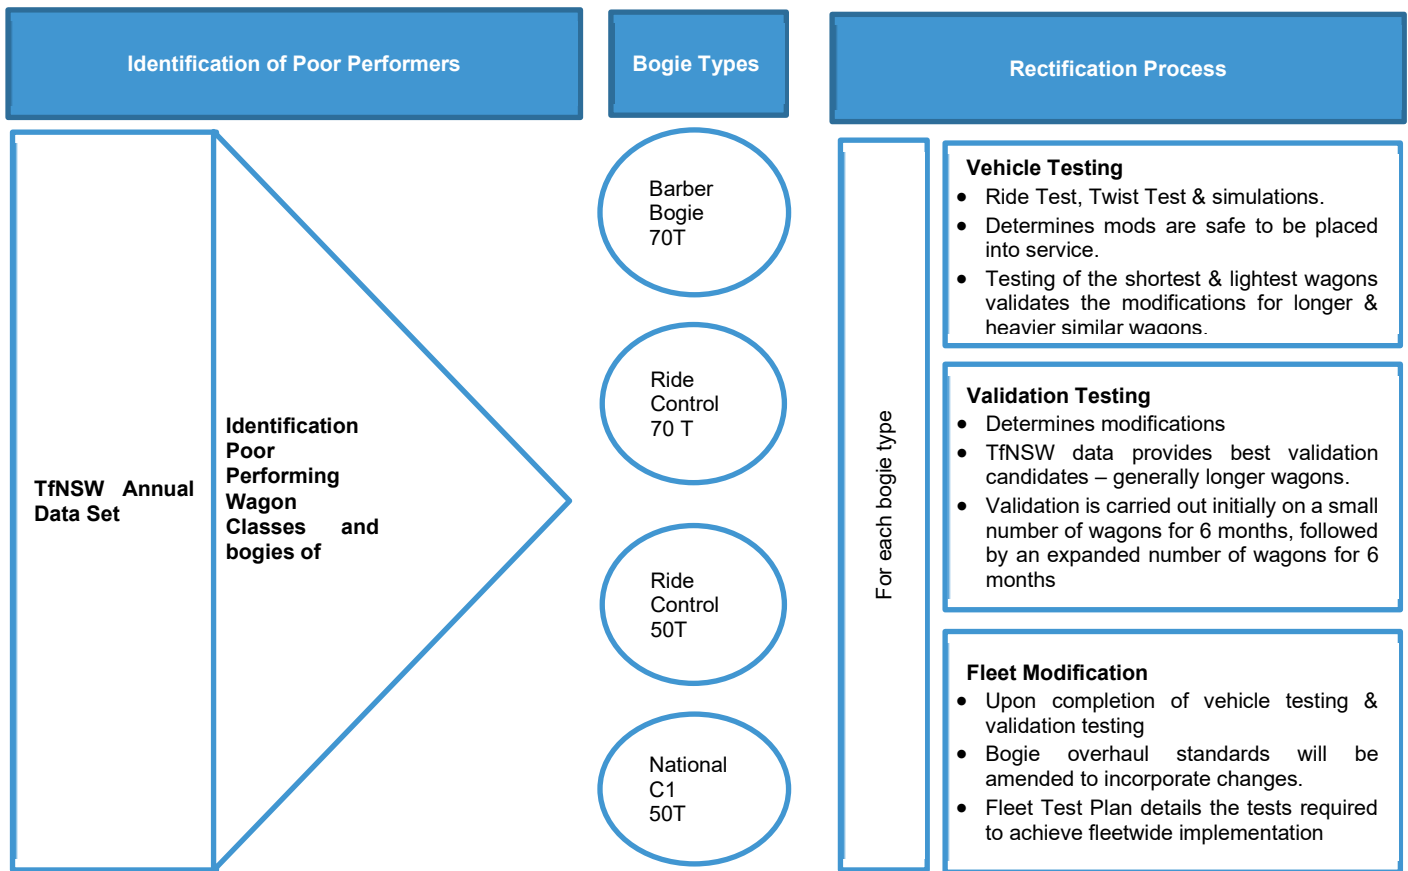

5. Wagon Wheel Rectification

Pacific National has adopted a bogie type response to AoA exceedances rather than a focus on individual wagons. Testing of bogie modifications was completed during 2021. Validation of modifications is being undertaken during 2022. The scheduling of priority wagon rectifications is dependent upon the final results of wagon validation currently being undertaken by PN in accordance with the Annual Wheel Squeal Rectification Plan submitted to Transport for NSW².

The process for rectification adopted by PN in 2022 is unchanged from that presented in previous years Rectification Plan and is summarised in **Figure 1**.

¹ EPL 21364 Part 8, Condition E1 Rolling Stock Operations Licence Dictionary, p23.

² Asset Standard Authority in accordance with RSU 400 Series – Minimum Operating Standards for Rolling Stock – Freight Vehicle Specific Interface Requirements - 2.7.1 Wagon (bogie) steering performance requirements.

Pacific National identified 4 bogie types that represent the extent of the PN fleet that require investigation for the priority wagons. These bogie types are;

- 70 T Barber Bogie;
- 70 T Ride Control;
- 50 T Ride Control; and
- 50 T National C1.

Using the staged rectification process, each of the bogie type(s) will undergo **Vehicle Testing** and **Validation Testing** prior to the implementation of **Fleet Modification**.

Pacific National has made progress despite continuing constraints imposed upon operations during 2021 – to date,

- 70T Ride Control bogie modifications provide the most promising prospects of timely roll out of fleet modifications at this time.
- 70T Barber bogie modifications still require improvement to meet TfNSW performance expectations and PN have implemented trials of further modifications towards this.
- 50T Ride Control bogie modifications closely follow that of the 70T variant; therefore, we remain hopeful that this modification proves effective.
- There is no cost-effective modification for National C1 bogies and these will be phased out and replaced as the modification for other bogie types are implemented to the wagon maintenance manual.
