1. Annual Rolling Stock Report

Pacific National Pty Ltd ('PN') is the holder of Environmental Protection Licence 21364 ('EPL 21364'). In accordance with Condition R4.2, PN is required to submit an Annual Rolling Stock Report ('the Report') by 28 February for the previous calendar year reporting period.

As EPL 21364 was not activated until the 5 August 2020, this Annual report is for the reporting period 5 August 2020 to 31 December 2020.

Requirements for this Report and listed in **Table 1**.

2. Major Engine Overhaul

A locomotive Major Engine Overhaul is defined as per the Stock Licence Dictionary of EPL 21364 as either:

A scheduled maintenance procedure that either replaces, or inspects and qualifies each and every power assembly of the locomotive engine.

A major engine overhaul will not include unscheduled maintenance to replace these components due to unforeseen failure of engine component(s) prior to scheduled maintenance;

or

Installation of a remanufactured or freshly manufactured engine into an existing locomotive.

Table 2 provides a overview of locomotives which underwent major engine overhauls during this reporting period.

3. Locomotive Noise Testing

Condition M5.3 and R4.2 b requires noise performance testing on locomotives undergoing a major engine overhaul.

For the reporting period, the required noise monitoring of locomotives as per conditions prescribed in EPL 21364 were not undertaken. Pacific National takes seriously this omission and offers the following explanation and rectification steps to ensure that future compliance obligations are met in accordance with EPL 21364.

In July 2020, Pacific National had completed a significant internal corporate and company restructure which ultimately led to a significant number of internal redundancies and re-alignment of accountabilities and responsibilities throughout the organisation. This significant internal transformation contributed to a lack of change management process in relation to the obligations under the EPL, which contributed to the oversight of not ensuring that noise monitoring was being scheduled in-line with the scheduled major engine overhauls.

This lack of change management process and communication was further complicated by the current arrangement of all our major engine overhauls being conducted by external third parties who were not aware of or informed of the new EPL obligations.

Since becoming aware of this significant failure in our change management procedure. Pacific National has implemented the following.

Pacific National has in the last 12 months implemented a compliance/obligations management platform (CAMMS) to ensure that obligations required under our EPL are captured and managed within CAMMS. CAMMS records the obligation, assigns an obligation Owner and an obligation Action owner who has accountability and responsibility to ensure that compliance and obligation requirements are met. We have also inserted EPL requirements into our overarching internal HSE Assurance program to ensure that where relevant, specific obligations are reviewed and assessed for internal compliance on an annual basis.

Pacific National are in the process of finalising the engagement of a “competent acoustic practitioner” to undertake this work and have engaged with our external service providers contracted to undertake the engine overhauls to ensure alignment and requirements.

Pacific National regrets this failure in our change management process and is committed to ensure that all obligations under the EPL are adhered to.

4. Angle of Attack

Priority Wagon Classes are defined¹ to as:

a class of freight wagons, as identified to the licensee by Transport for NSW, requiring rectification in accordance with Transport for NSW's standard titled THR RS 00400 ST RSU 400 Series – Minimum Operating Standards for Rolling Stock – Freight Vehicle Specific Interface Requirements Version 2.0 Issued date: 24 August 2017, and being one of the following priority wagon classes: RKWY, RQCY, VQCY, RKFX, RRY, CQWY, RKM, RKKY, RKB, RRY, RKCX, RKHF, VQTY, RQTY, PBGY, ABSY, CQJY, CQGY, CQY, CQEY, CQPY.

For reporting year Appendix A summaries the AoA events and wheel recitation status for identified priority wagons.

- The priority wagon AoA exceedance data set as provided by TfNSW is provided as **Appendix A** (Sheet 2).
- Identification of wagons exceeding the AoA threshold at Beecroft are identified in **Column B** of **Appendix A** (Sheet 2).
- The rectification status of the priority wagons is detailed in **Column K** of **Appendix A** (Sheet 2).

¹ EPL 21364 Part 8, Condition E1 Rolling Stock Operations Licence Dictionary, p23.

5. Wagon Wheel Rectification

The scheduling of priority wagon rectifications is dependent upon the final results of wagon testing and verification currently being undertaken by Pacific National in accordance with the Annual Wheel Squeal Rectification Plan submitted to Transport for NSW².

Pacific Nationals 2020 Rectification Plan presented a fleet wide approach targeting bogie types that are represented in the TfNSW AoA exceedance data, rather than a focus on individual wagons reporting exceedances.

The process for rectification adopted by PN in 2021 is unchanged from that presented in the 2020 Rectification Plan and is summarised in **Figure 1**.

Pacific National identified 4 bogie types that represent the extent of the PN fleet that require investigation for the priority wagons. These bogies types are;

² Asset Standard Authority in accordance with RSU 400 Series – Minimum Operating Standards for Rolling Stock – Freight Vehicle Specific Interface Requirements - 2.7.1 Wagon (bogie) steering performance requirements.

- 70 T Barber Bogie;
- 70 T Ride Control;
- 50 T Ride Control; and
- 50 T National C1.

Using a staged rectification process, each of the bogie type will undergo **Vehicle Testing** and **Validation Testing** prior to the implementation of **Fleet Modification**.

Pacific National has made progress despite the constraints imposed upon operations during 2020 as a result of the COVID19 pandemic with wagon testing and advancing the position of validation tests.

- 70T Ride Control bogie modifications provide the most promising prospects of timely roll out of fleet modifications at this time.
- 70T Barber bogie modifications still require improvement to meet TfNSW performance expectations and PN have implemented trials of further modifications towards this.
- 50T Ride Control bogie modifications closely follow that of the 70T variant; therefore we remain hopeful that this modification proves effective.

Completing wagon testing and progressing validation trials remains our focus for 2021.
