- Appendix A: Annual Rolling Stock Performance Data..... 9

1. Annual Rolling Stock Report

Pacific National Pty Ltd (PN), is the holder of Environmental Protection Licence 21364 ('EPL').

In accordance with **Condition R4.2**, PN is required to submit an Annual Rolling Stock Report (the Report) to the NSW Environment Protection Authority ('EPA') by 28 February each year for the previous calendar year reporting period.

This Annual report is for the reporting period **1 January 2023 to 31 December 2023**.

Requirements for this Report are listed in **Table 1**.

Table 1: Condition R 4.2: Annual Rolling Stock Report

No.	Requirement	Location in Report
R4.2	The licensee must submit to the EPA no later than 28 February of each year an Annual Rolling Stock Performance report for the previous calendar year (1 January to 31 December). The report must include:	
a	the number of the licensee's locomotives that underwent a Major Engine Overhaul in the calendar year and, for each locomotive:	Section 2
i	<i>the unique identification number of the locomotive;</i>	Table 2 Appendix A Sheet 1 (Col A)
ii	<i>details of the class, type/model, the engine manufacturer and engine model; and</i>	Table 2 Appendix A Sheet 1
iii	<i>the date of the Major Engine Overhaul.</i>	Table 2 Appendix A Sheet 1
b	details of all locomotives identified under Condition M5.3(e) and a summary of the noise mitigation measures in the plan of management required by Condition M5.3(e) that were undertaken and completed during the calendar year, if any.	Section 2 Table 2 Appendix A Sheet 1 & 2
c	details of any unacceptable Angle of Attack event identified for a freight wagon of a priority wagon class within the meaning of this licence during the calendar year for the purposes of Condition M5.2. These details must include:	Section 2
i	<i>the unique identification number of each freight wagon involved and the time and date of any unacceptable Angle of Attack event at a Wayside Monitoring System location;</i>	Appendix A Sheet 3 Column B&C

No.	Requirement	Location in Report
ii	<i>whether the freight wagon identified under Condition R4.2(c)(i) has been rectified in accordance with Condition U5 of this licence, or when rectification is scheduled to occur for the identified freight wagon; and,</i>	Appendix A Sheet 4 Column H&I
iii	<i>where a freight wagon of a priority wagon class that has been subject to rectification under Condition U5 has recorded an unacceptable Angle of Attack, the additional measures to ensure the wagon has an acceptable Angle of Attack and timeframes for implementation of those measures.</i>	Appendix A Sheet 4 Column J Section 4
d	the number of freight wagons of a priority wagon class that underwent rectification under Condition U5 during the reporting period and for each freight wagon:	
i	<i>the unique identification number of the freight wagon;</i>	Appendix A Sheet 5 Column A
ii	<i>details of the class of the freight wagon; and</i>	Appendix A Sheet 5 Column B
iii	<i>a summary of the corrective measures undertaken to rectify the freight wagon, including the date of freight wagon rectification.</i>	Appendix A Sheet 5 Column C&E

2. Locomotive Major Engine Overhaul

As set out in the Rolling Stock Operations Licence Dictionary ('RSO Dictionary'), a locomotive Major Engine Overhaul ('MEO') is defined as either:

A scheduled maintenance procedure that either replaces or inspects and qualifies each and every power assembly of the locomotive engine.

A major engine overhaul will not include unscheduled maintenance to replace these components due to unforeseen failure of engine component(s) prior to scheduled maintenance;

or

Installation of a remanufactured or freshly manufactured engine into an existing locomotive.

Table 2 below provides an overview of locomotives that underwent MEO during the 2023 reporting period (**Appendix A**, Sheet A). Twenty-eight (28) locomotives underwent MEO in the 2023 calendar year.

3. Locomotive Noise Testing

3.1. 2023 Updates

PN has had regular consultation with the EPA during the implementation of the post engine overhaul locomotive noise testing program since the inception of the licence in 2020. During 2023 PN:

- Implemented trained technician testing which has facilitated expedition of the noise testing requirements;
- Undertook an independent review of the quality and outcomes of noise testing carried out to date; and
- Consulted with the EPA regarding the independent review and potential for licence amendment.

3.2. EPA Amendment June 2023

In June 2023 the EPA amended EPL21364 to require noise testing be conducted within 6 months of MEO. **Appendix A**, Sheet 1 has been amended to include the due date of noise testing for locomotives undergoing MEO post the amendment date. Locomotives undergoing MEO prior to this date are being scheduled for noise testing, where possible, during routine maintenance events.

3.3. Locomotive Noise Testing Results

Overhauled Locomotives

Table 2 and Appendix A Sheet 1 lists those locomotives overhauled during the 2023 reporting period along with the status of noise testing. Of the 27 locomotives undergoing MEO, PN has undertaken 17 noise tests.

Table 2: Locomotive Major Engine Overhauls for Reporting Period

Loco Id	Locomotive Class	Engine Manufacturer	Engine Model	Date of Overhaul	Noise testing undertaken (Y/N)

In addition, during 2023 PN has undertaken locomotive noise tests on 15 additional locomotives that had MEO carried out during previous reporting years (See **Appendix A**, Sheet 2).

Management Plan Requirements

A management plan is required for locomotives that exceed the EPA noise and tonality limits provided in Condition L3.5 and L3.6, respectively of EPL 21364. **Appendix A** Sheet 2 provides a summary of all locomotive noise tests undertaken to date (since licence inception) and the requirement for a Noise Management Plan ('NMP').

NMP requirements were discussed with the EPA during both the August 2022 and December 2023 consultation.

- In August 2022 PN provided a presentation demonstrating that Management Plans for a class of locomotive should not be adopted until a representative sample of locomotives are noise tested to determine if a fleet wide versus individual locomotive plan is required – this is represented as a 'Watching Brief'.
- Noise outliers for a locomotive class currently being considered under the amendment request relating to Condition M5.3a are at this point deemed to not require a management plan based on the representative sample of locomotives demonstrating compliance. Note that each new test will be used to recalculate the 95% confidence interval of compliance.

Regarding PN's fleet of 90 Class locomotives, noise tests conducted to date on a representative sample of 90 class locomotives have indicate general noise (dB) compliance however, there is indicative potential for exceedance of tonality criteria. The operational use of the 90 Class locomotive fleet is currently undergoing optimisation, seeing a majority of the 90 class moving to stowage and end of life. For the balance of fleet, PN's Locomotive Asset Engineering Team are

investigating the noise data and means for mitigation from a technical, investment and time perspective.

4. Angle of Attack 2023 Data

As set out in the RSO Dictionary, Priority Wagon Classes are defined as:

a class of freight wagons, as identified to the licensee by Transport for NSW, requiring rectification in accordance with Transport for NSW's standard titled THR RS 00400 ST RSU 400 Series – Minimum Operating Standards for Rolling Stock – Freight Vehicle Specific Interface Requirements Version 2.0 Issued date: 24 August 2017,

and

being one of the following priority wagon classes: RKWY, RQCY, VQCY, RKFX, RRY, CQWY, RKM, RKKY, RKB, RRKY, RKCX, RKHF, VQTY, RQTY, PBGY, ABSY, CQJY, CQGY, CQYY, CQEY, CQPY.

For the 2023 reporting period **Appendix A** (Sheet 4) summarises the Angle of Attack (AoA) events and wheel rectification status for priority wagons exceeding during 2023.

During 2023, 13 priority wagons exceeded the AoA threshold at Beecroft after rectification (**Appendix A** Sheet 4 Column J). Modified wagons that have continued to exceed the AoA threshold at Beecroft have been identified to have incorrect configurations; i.e. the rectification implemented has not occurred in line with the modification specification. In these cases adjustments have been made prior to the wagon being returned to service. With the modification program transitioning from discrete trial to business-as-usual processes it is expected that these errors will decline significantly and / or be eliminated. It is noted also that some modified RKWY wagons continue to exceed the Beecroft AoA threshold. During consultation with the EPA in June 2022 the EPA acknowledged the step change improvement in AoA performance of modified RKWY wagons and supported PN's ongoing rectification program.

5. Wagon Rectification

PN has adopted a bogie response method to AoA exceedances rather than a focus on individual wagons or wagon classes. Modifications implemented to rectify wagons are based on bogie type and are:

- Ride Control Bogies – Alternate / Stiffer control springs plus alternate centre bowl liners;
- Barber bogies – Friction (Split) wedges;
- Selected bogies – bolster resizing to control lateral movement of friction wedges.

The wheel rectification strategy and forecast have been provided to the NSW EPA during consultation in June 2022 and communications in May 2023. During 2023 PN:

- Worked with suppliers to establish a local supply chain of componentry required for bogie modifications – overcoming delays caused by international supply.
- Updated wagon maintenance manuals;
 - to ensure wagons are fitted with rectified bogies during wagon maintenance, and
 - to remove national C1 bogies compatibility from any priority wagon.
- Reworked existing overhauled Bogies to develop a pool of modified bogies to accelerate the distribution of compliant bogies to maintenance workshops servicing priority wagons.

- Established work orders against priority wagons within PN's asset management system to monitor the progress of bogie changeouts.
- Established business as usual operating of bogie changeouts by establishing work orders for rectification on all priority wagons.

PN wagon rectification is currently tracking ahead of forecasts provided in prior reporting to the EPA with 19% of priority wagons having undergone bogie modifications. To the end of the 2023 calendar year 115 wagons are recorded as having undergone bogie modifications.

Note:** this figure includes wagons that may have been modified prior to 2023 and the establishment of modification tracking systems. Rectified wagon details are provided in **Appendix A, Sheet 5.

5.1. Continuous Improvement

During 2023 PN and TfNSW have established improved systems of communication to facilitate the transfer of information relating to wagon modifications. PN provides information to TfNSW on modification details and TfNSW uses the information to track compliance post modification. This collaboration will facilitate reporting to the NSW EPA into the future.

If you have any questions in relation to this report, please do not hesitate to me.

Yours sincerely,

Heath Anderson

¹ Reanalysis by Acoustic Studios indicates compliance with EPA criteria

² Review by Acoustic Studios indicates low likelihood of non compliance within the locomotive class based in representative sample indicating 95th percentile exceedence of highest recorded noise level in each notch

³ Locomotives which underwent MEO prior to the June 16 ammendment to EPL 21364 requiring testing be undertaken within 6 months of MEO will be noise tested opportunistically during regular maintenance scheduling

* Classification

Not Required	Noise testing post major engine overhaul did not identify non compliance with EPL criteria
Not Required ¹	Reanalysis by Acoustic Studios indicates compliance with EPA criteria
Not Required ²	2 Review by Acoustic Studios indicates low likelihood of non compliance within the locomotive class based in representative sample indicating 95th percentile exceedence of highest recorded noise level in each notch
2024 Operational Review	Pacific National are in the process of optimising this fleet, seeing a majority stow and move to End of Life
Watching Brief of Class	A representative sample of locomotives of the class have not been tested to allow for determination of class versus individual locomotive management plan
